

The City of Bakersfield and PG&E are working together to convert 12,865 streetlights to LED by June 30, 2018.

This is a bright idea.

LED FIXTURES USE 50-75% LESS ENERGY THAN TRADITIONAL BULBS

IN ENERGY COSTS ALONE, THE CHANGE WILL SAVE THE CITY OF BAKERSFIELD NEARLY

\$700,000 PER YEAR

LED BULBS LAST FOUR TIMES AS LONG

WHICH MEANS ADDITIONAL SAVINGS ON REPLACEMENT COSTS

OUR NEW LIGHTS ARE ADAPTABLE TO BE UPGRADED WITH AUTOMATED DIMMING AND WI-FI TO SEND A SIGNAL WHEN THEY GO OUT

THE CRISP, NATURAL LIGHT INCREASES VISIBILITY AND MAKES OUR STREETS AND SIDEWALKS SAFER TOO

\$0

THE FIXTURES ARE PAID FOR WITH ON-BILL FINANCING, WHICH MEANS NO INITIAL CAPITAL COST TO THE CITY
