

IMPORTANT NOTICE – Wipes & Personal Hygiene Products Clog Sewer Lines

Many household products are labeled and marked as **DISPOSABLE** and/or **FLUSHABLE**; many baby and adult personal hygiene products, along with household wipes and cleaning towelettes are labeled both disposable and flushable. While these products may be marketed as a convenience item in this way, the truth is that these types of items have the ability to clog and stop up not only the sewer line on the property, but can also cause blockage and service problems in the public sewer system and pump stations.

The following items should **NEVER** be flushed into the sewer system:

Disinfecting/surface wipes	Mop or "Swiffer" type refills
Baby wipes	Paper towels
Jewelry wipes	Pet care wipes
Cosmetic wipes	First Aid wipes
Disposable diapers or diaper liners	Feminine hygiene products
Cotton swaps	ANY Moist type towelettes
Toilet cleaning pads	Medications

ANY CONSUMER ITEM THAT IS NOT TOILET PAPER

Every home and business has a sewer connection to the public sewer. This connection runs from the home or business to the sewer main where it is connected to the public sewer system. This on-site sewer line is the responsibility of the owner to keep clear so there are no back-ups of wastewater into the property. It is your responsibility to help keep this line clear and reduce the risk of costly repairs by following these guidelines.

Do not flush the listed items; place them in the trash, not the toilet.
